RELEASE DATE: July 8, 2010

MICROSTRAIN RECOGNIZED AS LAUREATE AND FINALIST IN THE 2010 COMPUTERWORLD HONORS PROGRAM

Williston, VT - MicroStrain, Inc has been recognized as Laureate and Finalist by the Computerworld Honors Program. This year's Honorees were commemorated during the 22nd Annual Laureates Medal Ceremony & Gala Awards Evening at the Andrew. W. Mellon Auditorium in Washington, D.C. For over two decades, Computerworld Honors has acknowledged those individuals and organizations that have used information technology to benefit society.

MicroStrain was recognized for its work with the US Navy to develop long term solutions for monitoring aircraft using energy harvesting technologies. MicroStrain, Inc President and CEO Steve Arms says,

"We are honored that MicroStrain is being recognized for our advances in energy harvesting technologies. With energy harvesting offering a huge new scope for deploying sensor networks, it will now be possible to gather data that was previously impossible to capture, while reducing costs and maintenance requirements for the sensor networks. We expect that these advances in energy harvesting will greatly benefit a wide range of industries and will allow for improved safety, development of new designs, and the optimization of maintenance."

"For the 22nd consecutive year, the Computerworld Honors Program has identified the most innovative organizations and people who use technology to promote positive social, economic and educational change," said Ellen Daly, senior vice president of IDG Enterprise Events. "Computerworld is proud to recognize both the Laureates and the 21st Century Achievement Award recipients from around the world."

Each year, members of the Charimen's Committee, a group of 100 Chariman/CEOs of global technology companies, nominates individuals and organizations around the world whose visionary applications of information technology promotes positive social and economic progress. Independent of the Laureate recognition, the Computerworld Honors Program also annually presents its Leadership Awards, each designed to honor the extraordinary achievements of selected individuals whose positive contributions to the IT revolution have left an indelible mark on the world.

-30-

MicroStrain, Inc

MicroStrain, Inc is a privately held corporation based in Williston Vermont. MicroStrain produces smart, wireless, micro-miniature displacement, orientation and strain sensors. Applications include advanced

automotive controls, health monitoring, inspection of machines and civil structures, smart medical devices and navigation/control systems for unmanned vehicles, and energy harvesting technologies.

About Computerworld Honors Program

Founded by International Data Group (IDG) in 1988, the Computerworld Honors Program is governed by the not-for-profit Computerworld Information Technology Awards Foundation. In its 22nd year, Computerworld Honors is the longest running global program to honor individuals and organizations that use information technology to promote positive social, economic and educational change. The Chairmen's Committee nominates the individuals or organizations, and nominees submit a Case Study for review by the Judges, out of which 152 Laureates are selected. At the awards ceremony, honors are given to 50 Finalists - 5 Laureates from each of the 10 categories - and the 21st Century Achievement Awards are presented to one Finalist in each category. Additional information about the program and a Global Archive of past Laureate case studies and oral histories can be found at the Computerworld Honors website (<http://events.computerworld.com/Honors2010>).

About Computerworld

Computerworld is the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (www.computerworld.com), weekly publication, focused conference series and custom research from the hub of the world's largest (40+ edition) global IT media network. In the past six years alone, Computerworld has won more than 100 awards, including Folio Magazine's 2006 Gold EDDIIE Award for the best technology/computing magazine, the 2004 and 2006 Magazine of the Year Award, and 2006 Best Overall Web Publication from the American Society of Business Publication Editors (ASBPE). In addition, in 2007 Computerworld's then editor in chief, Don Tennant, received the prestigious Timothy White Award from American Business Media. Computerworld leads the industry with an online audience of over 2 million unique, monthly visitors and a print audience of 1,222,000 readers each week (IntelliQuest CIMS Spring 2007).
