# 3DM®-CX5-10
Inertial Measurement Unit (IMU)

3DM-CX5-10 – high-performance, industrial-grade inertial measurement unit (IMU)

The **LORD Sensing 3DM-CX5** family of high-performance, industrial-grade, board-level inertial sensors provide a wide range of triaxial inertial measurements and computed attitude and navigation solutions.

In all models, the Inertial Measurement Unit (IMU) includes direct measurement of acceleration and angular rate, and are fully temperature-compensated and calibrated over the operating temperature. The use of Micro- Electro-Mechanical System (MEMS) technology allows for highly accurate, small, lightweight devices.

The LORD Sensing **MIP Monitor** software can be used for device configuration, live data monitoring, and recording. Alternatively, the **MIP Data Communications Protocol** is available for development of custom interfaces and easy OEM integration.
